The city's energy demand has grown 17% annually since 2020, but traditional grid infrastructure just can't keep up. That's where the Ouagadougou Energy Storage Cabin comes in, combining solar

IFC's engagement has provided Burkina Faso's government with insights on developing private sector-backed battery storage in Burkina Faso, contributing to national ambitions and policies

In Burkina Faso, the government intends to accelerate the deployment of battery-based electricity storage systems in the coming years.

A city where 30% of electricity vanishes like mirages in the Sahara before reaching homes. Welcome to Ouagadougou's energy reality. But here's the kicker - the Ouagadougou energy

Nearly double the megawatt-hours of large-scale battery energy storage systems (BESS) were under construction in Australia by the end of 2022 compared to the previous year.

Burkina Faso gets most of its electricity from biofuels like charcoal and wood while oil products account for one-third of the total energy supply, says the International Energy Agency (IEA). The country has

A solar farm in Ouagadougou generating clean energy by day, while specially designed battery containers hum quietly nearby - like giant smartphone power banks for the national grid. That's
