Invinity Energy Systems, which develops vanadium redox flow batteries (VRFB), plans to expand its manufacturing footprint in Scotland, UK.

EPSRC UK grant, Energy Storage for Low Carbon Grids (EP/K002252/1 ) Figure 1. A schematic view of the alkaline polysulfide/air redox flow battery The aim of this

Market and Technology Assessment of Flow Batteries for Developing Economies This report was commissioned by the Faraday Institution and written by 1Foresight Transitions Ltd, with 2Swanbarton

As investments in renewable energy grow to achieve governments' net zero targets, energy storage solutions will be in high demand. They will be

Part 1. What is the flow battery? A flow battery is a type of rechargeable battery that stores energy in liquid electrolytes, distinguishing itself

Invinity Energy Systems today announces that it has reached an agreement to proceed with the LoDES project. Invinity has acquired the rights to develop,

Invinity battery storage units at Motherwell. Courtesy of Invinity. Invinity has acquired the rights to develop, build, own and operate an up to 20.7 MWh vanadium flow battery system using the
